

The logo is a stylized hexagon with a white center and a grey outer ring. A large, light purple triangle points to the right, partially overlapping the hexagon. The background features faint blue circuit-like lines with dots at the corners.

BEACON INNOVATION HUB COURSE COMPETENCE SUMMARY WEEK ONE.

Where Ideas Transform The Future.

Compiled: by MR S MHLOPHE

QUESTION 1: What specific technical capability, architectural pattern, or system configuration from your coursework did you validate or deploy since our last sync? (What activities did you do this week?)

- **Overview of Web and Cloud Development:** analyzing how modern applications operate over distributed networks
- **Front-End vs. Back-End Dynamics:** To contextualize how software components are divided during the development phase, you explore the core concepts of **Front-End Development** (user-facing layout, presentation) alongside the foundational value of **Back-End Development** (data management, server logic, infrastructure)
- Created a demo to demonstrate modern coding practices from the Coursera SWE course Module 1 and 2

QUESTION 2: What blockers are affecting your progress, and what support do you need?

None thus far, I was able to complete my tasks from the week that I had intended, and complete my tasks this week

BEACON INNOVATION HUB

Where Ideas Transform The Future

QUESTION 3: What measurable task or test will you complete before next stand-up?

- Enhance my skill in system design and software architecture
- DIVE DEEPER INTO JAVASCRIPT CONCEPTS AND ITS APPLICATION
- Look into backend development + database design
- Complete Module 3 on my course in Coursera
